

SAFETY & SECURITY

How will safety and security in our schools be enhanced?

One of our primary goals as a school district has been to provide safe yet welcoming environments for our students, staff and families. Our district currently supports this by providing security cameras, keyless entry systems with card readers, and main entry lockdown mechanisms for all of our schools. The 2019 Bond proposal will create secure welcome centers in all Ann Arbor school buildings. New enhancements will include the following:

- School entries will be remodeled to redirect the flow of visitors into the building. Vestibules will be constructed or reconfigured to require visitors to enter through the main office. School offices that are not located near a school's main entrance will be relocated to the front of the building.
- All schools will receive upgraded electronic access systems, and additional security cameras across the District.
- Other safety measures include expanding and replacing parking lots, new exterior lighting, classroom window treatments, and replacing deteriorating sidewalks as well as asphalt play areas.

Electronic Access Systems

Secure Entry Vestibule

GOALS FOR 2019 BOND

Ann Arbor Public Schools and the Board of Education are embarking on this Bond Program because we believe:

- Our community values a quality education for every child
- AAPS buildings and grounds are aging and in need of major capital investment
- The quality of the built environment directly impacts student achievement and the core mission of the District
- We have received beautiful schools and properties from previous generations, and it is our responsibility as good stewards to prepare for future generations in AAPS
